Welcome to the FAME newsletter

As February dawns, we're keen to unveil the latest updates, insights, and progress in the **FAME**'s mission to foster innovation, collaboration, and knowledge exchange within our community.

In this issue, you will find a focus on the newly updated sub-section of the **Standards list.**

FOCUS ON THE KNOWLEDGE BASE

STANDARDS

Ongoing enhancements to the Knowledge Base standards list are aimed at improving user experience, introducing new features to enhance navigation and accessibility. The evolving standard list currently contains **331 entries** and is continuously updated with the latest standards relevant to the CCAM field.

One of the standout additions is the introduction of **three new technology domains: big data, ethics, and infrastructures**. This is a feature designed to offer users a more targeted approach to exploring our vast repository of standards. Now, users can delve into specific technology domains to uncover standards tailored to their areas of interest and expertise.

Another notable addition is the filter by **"scope"**, allowing users to refine their search results based on the specific focus areas and applications of the standards they are seeking.

Furthermore, each standard listing now includes a **direct link to the standard**, enabling users to access further details or directly download the standard.

Finally, users can now easily identify the most recent iterations of standards with the inclusion of the **details of the version of the standard**. Staying informed about the latest updates and revisions has never been easier, ensuring users always have access to the most up-to-date information.

These enhancements represent our commitment to continuously improving the KB to better serve the needs of the CCAM community!

EUCAD EVENTS

Don't miss the opportunity to participate in the upcoming **EUCAD Symposium 2024**! The 3rd Interactive Symposium on Research & Innovation for Connected and Automated Driving in Europe will take place on 18-19 April, in conjunction with the TRA Conference in Dublin. The Symposium is organised by the FAME initiative and supported by the European Commission Directorate General for Research & Innovation (RTD) as well as the CCAM Partnership.

Complementary to the Connected, Cooperative and Automated Mobility (sub-)theme of TRA 2024, the event aims to delve deeper into specific key topics and challenges for CCAM Research & Innovation and testing, in Europe and beyond.
